EXPERIENCE & SELECTED WORK

Phalendrome Solutions

Collaborative client work

Work with a partner to design and build websites and client-side/admin-side data-management applications, and provide IT consulting to small businesses.

MHT Enterprises | Digital pamphlet website

Independent project

- Designed and built a digital pamphlet website for the business.
- Handled DNS configuration and deployed the site on Cloudflare.

Freelance brand identity

MHT Enterprises · Jodin Enterprises

Created logo designs for small businesses, translating their identity into clear, practical visual marks.

Umuzi Design Thinking Challenge

Team project

Collaborated on the challenge "Improving access to healthcare services," taking work from user research to a tested mobile-app prototype and final pitch.

TECHNICAL TOOLKIT

Programming: Python (currently developing through FNB App Academy), Java, JavaScript

Web: HTML, CSS, website design and implementation

Data: SQL, database management, data analytics

Platforms & delivery: Cloudflare, DNS configuration, website deployment, Git

Foundations: Cybersecurity fundamentals, systems and networking, UI design, user-centred design

PROFESSIONAL DEVELOPMENT

FNB App Academy | Python Masterclass

Phase 2 · In progress

Selected to progress beyond the first round; continuing structured Python learning and programming practice.

EDUCATION

BSc Information Technology

North-West University · Vanderbijlpark

Coursework includes programming, database management, cybersecurity fundamentals, UI design, systems and networking, and data analytics. **Distinction in Introductory Programming.**
